

# Veem: Payments for QBO

**Veem is the global payments network built for small business.**  
**We're transforming payments in over 100 countries.**

## Veem and QuickBooks

Veem's QuickBooks Online (QBO) integration helps users pay simply, quickly, and globally. With Veem, users can send money to businesses in over 100 countries efficiently. Our QBO two-way synchronization means users can approve and pay bills created in QBO in just one click. Plus, they can pull information from QBO to use with Veem. That means no double entry, and accountants & bookkeepers can prepare payments for their clients in advance.

Save even more time with Intuit's single sign-on for Veem! Sign up straight from your QuickBooks for Accountants Dashboard under apps, or select "Sign In With Intuit" when you sign up for a Veem account.

## QBO – Veem is your preferred payment app

Veem & QBO can help you get ahead and grow your bottom line.

- > Streamline your processes and manage your clients better: Send, receive, and track multiple client payments, invoices, and everything else you do, all in one place.
- > Keep your data safe: Require multiple approvers, limit certain users abilities, or require two-factor authentication before transfers can be processed.

- > Grow your knowledge: free online training – learn more about international payments and foreign exchange.
- > Connect with new clients: Through our MVP program, Veem will present your accounting firm to our over 80,000 users. Open your practice and connect with new clients instantly.

### FEATURES

- > Veem verifies both the sender and receiver's information
- > Tracks payment status in real time
- > Offers transparent and competitive exchange rates when paying in foreign currencies
- > Provides full customer support on every payment from start to finish
- > Dedicates an Accountant Manager for Accountant Partners

### BENEFITS

- > Increase confidence in your cash flow by monitoring payments in real time
- > Build transparency and establish trust in your supply chain
- > Spend less time managing and looking for payment information and profiles
- > Improve reconciliation with accurate payment amounts
- > Manage all clients from one dashboard
